Angelos Papamichail

angelos.papamichail@gmail.com | Thessaloniki, Greece | GitHub | LinkedIn

Full-stack developer with experience in SvelteKit, Go, Python, data-driven applications, and end-to-end product delivery. I build practical web products from database and backend design through frontend, deployment, and operations.

EXPERIENCE

AI Engineer (GSoC 2026) OpenCouncil (Schema Labs / GFOSS) | 2026-05 - Present

- Fine-tuning an open-source Greek ASR model (Whisper) on municipal council speech, with LLM post-correction, to reduce manual review effort.
- Active maintainer on the OpenCouncil platform: fixed severe Next.js hydration errors, improved Turbopack compile times, and shipped UI for unauthenticated workflows.
- Building a dataset-exploration and review-UI prototype to measure transcription error rates before and after fine-tuning.

Full-Stack Developer UniTrip.gr | 2026-03 - Present

- Built the public SvelteKit booking platform and PocketBase data model from scratch.
- Implemented shareable group booking flows so additional travelers can join after the initial reservation.
- Integrated Viva Payments and payment verification flows for online bookings.

Founder SkipQ | 2026-01 - Present

- Built a working full-stack demo: customer self-ordering, staff order claims, open tabs, and an admin menu editor.
- Migrating the demo to a Go backend and Svelte SPA over ConnectRPC, with shared proto contracts and SSE live updates.
- Designed for cloud or local deployment, so a venue keeps taking orders when the internet drops.

Founder PulseCheck | 2026-01 - Present

- Leading product, positioning, and engineering for an EU mid-market HR audience.

SELECTED PROJECTS

Agronet Automation Suite Vue.js, Chrome Extensions API, LLM Integration, DOM Manipulation

- A sophisticated browser extension and automation suite built to solve critical inefficiencies in the agricultural cooperative's ERP data entry platform.
- Batch Data Injection: Enabled copying data from one plot to multiple others instantly, eliminating hours of repetitive clicks.

FindDoctors Aggregator Server (GitHub) Go, REST API, Concurrent Workers, TypeScript Types, TDD

- High-performance Go backend that aggregates appointment availability from finddoctors.gov.gr, making it easier to discover where and when public health appointments are available across hospitals and primary care centers.
- Unified Smart Search: Combines nationwide, proximity, hospital, and primary care center search into a single endpoint.

OpenCouncil (GSoC Repo) Python, Whisper / ASR, PyTorch, Next.js, React, TypeScript

- Active maintainer on OpenCouncil by Schema Labs (schemalabz/opencouncil), the open-source platform that makes Greek municipal council meetings searchable and accountable. Also a Google Summer of Code 2026 contributor, fine-tuning an open-source Greek speech-to-text model to reduce the corrections human reviewers make by hand.
- GSoC 2026: Greek ASR Fine-Tuning: Fine-tuning Whisper on council speech with LLM post-correction to lower transcription error rates and manual review effort.

PulseCheck Full Stack, Product Analytics, Startup

- Founder of PulseCheck, a startup that measures the real pulse of a company's workforce through genuinely anonymous surveys and actionable insights, aimed at EU mid-market HR teams who are tired of low-participation engagement tools.
- Credible Anonymity: Anonymity is treated as the core product promise, not a checkbox, so employees answer honestly.

SKILLS

Python | JavaScript/TypeScript | Go | C/C++ | SQL | SvelteKit | Vue.js | React | React Native | Astro | Hugo | PocketBase | Docker | Git | Linux | CI/CD

EDUCATION

Master of Engineering, Electrical and Computer Engineering Aristotle University of Thessaloniki | 2014 - 2023

GPA: 7.33

Smart Building Programming Technician (Level 1) IDEA Lifelong Learning Center | 2024 - 2024

CERTIFICATIONS

Back End Development and APIs (freeCodeCamp) | Data Analysis with Python (freeCodeCamp) | JavaScript Algorithms and Data Structures (freeCodeCamp) | Scientific Computing with Python (freeCodeCamp) | Military service: Completed (HAF, 2021-2022)
