Angelos Papamichail

angelos.papamichail@gmail.com | Thessaloniki, Greece | github.com/angelospk | linkedin.com/in/angelos-papamichail

Full-stack developer with experience in SvelteKit, Go, Python, data-driven applications, and end-to-end product delivery. I build practical web products from database and backend design through frontend, deployment, and operations.

EXPERIENCE

AI Engineer (GSoC 2026) OpenCouncil (Schema Labs / GFOSS) | 2026-05 - Present

- Trained and published a Greek Whisper LoRA model (Hugging Face) with dataset review and reproducible evaluation tooling.
- Cut deletion rate from 5.25% to 3.13% on 391 held-out windows (117 meetings); overall WER change reported as inconclusive.
- Kept the Next.js platform healthy: fixed hydration failures, sped up Turbopack builds, shipped unauthenticated workflows.

Freelance Software Engineer Independent: UniTrip.gr, Ardas Youth Festival | 2026-03 - Present

- Put UniTrip.gr's group bookings and card payments online: trip discovery, reservations, Viva payments and a back office.
- Let extra travellers join a paid booking and kept QR/UTM attribution through checkout, so campaigns can be measured.
- Prototyped EventLens for Ardas Youth Festival: in-browser image conversion, resilient uploads and a manager-approved slideshow.

Digital Skills Trainer Social Inov | 2025-11 - Present

- Teach older adults everyday computer and phone use and online safety through guided, hands-on practice.

Digital Marketing & Social Media Trainer ΣΑΕΚ ΔΥΠΑ Ορεστιάδας | 2025-10 - Present

- Develop practical teaching materials for digital marketing and social media classes.

SELECTED PROJECTS

Agronet Automation Suite Vue.js, Chrome Extensions API, LLM Integration, DOM Manipulation

- Cut repetitive ERP data entry at an agricultural cooperative by an estimated 40% on the most-used workflows.
- Batch Data Injection: Enabled copying data from one plot to multiple others instantly, eliminating hours of repetitive clicks.

Aloud (GitHub) Go, TypeScript, SvelteKit, WebSocket, Streaming STT, LLM Integration

- Lets someone book a Greek public-health appointment by speaking: streaming speech-to-text feeds a deterministic, fully tested engine that fills the real search form.
- Deterministic Voice Engine: Intent extraction, specialty/area/date resolution, and form merging run scripted and fully testable, with no API key required.

Athens Transit (Live Map) Go, GTFS / GTFS-Realtime, OpenAPI, Svelte 5, MapLibre, Flutter

- Shows every OASA bus and trolley in Athens live on one map, with arrivals at every stop, a trip planner and alerts.
- Whole-network polling under one budget: At most 6 requests per second to OASA in total, evenly spaced, with backoff; a 403 or 429 stops all requests for 10 minutes.

FindDoctors Aggregator Server (GitHub) Go, REST API, Concurrent Workers, TypeScript Types, TDD

- Finds the earliest public-health appointment in one search instead of one provider at a time, across hospitals and primary-care centres on finddoctors.gov.gr.
- Built a concurrent Go API with bounded fan-out, retries and Prometheus metrics for upstream failures.

SKILLS

Python | JavaScript/TypeScript | Go | C/C++ | SQL | Swift (macOS) | SvelteKit | Vue.js | React | Next.js | React Native / Expo | Astro | Hugo | PocketBase | Supabase (Postgres, RLS) | FastAPI

EDUCATION

Master of Engineering, Electrical and Computer Engineering Aristotle University of Thessaloniki | 2014 - 2023

GPA: 7.33

Smart Building Programming Technician (Level 1) IDEA Lifelong Learning Center | 2024 - 2024

CERTIFICATIONS

Back End Development and APIs (freeCodeCamp) | Data Analysis with Python (freeCodeCamp) | JavaScript Algorithms and Data Structures (freeCodeCamp) | Scientific Computing with Python (freeCodeCamp) | Military service: Completed (HAF, 2021-2022)
